1. INTRODUCTION

Bogofinance Capital Markets Ltd (hereinafter referred to as the “Company”) is a Cyprus Investment Firm licensed. **FXJET** is owned as a trade name by Bogofinance Capital Markets LTD which is regulated by the Cyprus Securities and Exchange Commission (CySEC) under the license number 321/17. The Company is located at 132 Makariou III Avenue, Office 101, 3021 Limassol, Cyprus.

2. SCOPE

This Leverage and Margin Policy (the “Policy”) sets out how we set leverage and margin levels and procedures when you trade in Contracts of Difference (“CFDs”) with us. To see a full list of the CFDs we offer, please refer to our page www.fxjet.com

The purpose of this Policy is to explain the key aspects of leverage trading with margin and what leverage levels we make available depending on your knowledge and experience and regulatory requirements. It also outlines the impact on your margin and account where negative market movements occur.

3. LEGAL AND REGULATORY FRAMEWORK

The Leverage Policy is provided to Clients or potential clients in accordance with the provisions of the Investment Services and Activities and Regulated Markets Law of 2007 (No. 144(I)/2007), implementing Directive 2004/39/EC of the European Parliament and of the Council on Markets in Financial Instruments (“MiFID”) as amended by the Directive 2006/31/EC of the European Parliament and of the Council and Directive 2014/65/EU of the European Parliament and of the Council of 15 May 2014 on markets in financial instruments and amending Directive 2002/92/EC and Directive 2011/61/EU (MiFID II).

The Policy complies with Circular C271 which has been issued by CySEC on 4 June 2018 pursuant to ESMA’s product intervention decision on CFDs and Binary Options issued on 1 June 2018 which decision starts to apply from 1 August 2018 for CFDs.

4. APPLICABILITY

This Policy applies to Bogofinance capital Markets Ltd execution of orders on behalf of Retail clients and Professional clients according to the Regulations and Laws, as defined below. If you are an Eligible Counterparty as defined under the Regulations this Policy does not apply to you.

Factors: In general, it takes into consideration the following broad categories of factors:

- a) The regulatory requirements imposed on the maximum Leverage applicable to the clients located in European Union Member States.
- b) The capital base, financial strength, risk appetite and risk management of the Company.
- c) The result of the appropriateness test which is applicable for all retail clients.

- d) The asset class and instrument characteristics, including among others liquidity and trading volumes, volatility and standard deviation, market cap, country of issuer, hedging capabilities, general economic climate and geopolitical events.

5. OUR COMMITMENT

Treating Customers Fairly is central to our corporate culture and ethos. We have a duty to act honestly, fairly, professionally and in the best interests of our clients when dealing with them.

In relation to Leverage and Margin, we are required:

- a) To set leverage levels that reflect your knowledge and experience in trading in complex financial instruments like CFDs given that trading with leverage and margin is a key characteristic of trading in CFDs;
- b) To have regard to our duty to treat you fairly by avoiding aggressive leverage practices towards you;
- c) To have regard to the underlying performance fundamentals of the financial instrument on which the CFD is based, including historic volatility, depth of market [liquidity and trading volumes], market capitalization of the issuer and country of issuer of the underlying financial instrument, our ability to hedge market risk and the general political and economic environment. We adjust and calibrate the above variables in determining the leverage levels we offer for asset classes or financial instruments.
- d) Given that we effectively provide the leverage for which you trade, to have regard to our own risk management appetite and risk bearing capacity and to have in place policies, procedures and practices to manage our (primarily) market risk emanating from such leverage and margin trading by our clients;
- e) To apply regulatory requirements and caps as set by CySEC or any other regulator in any jurisdiction we offer our services to.

6. LEVERAGE RATIOS FOR DIFFERENT ASSET CLASSES AND FINANCIAL INSTRUMENTS AND DIFFERENT CLIENTS

We enable you to trade CFDs via our web and mobile trading platforms.

6.1. Retail Clients

For retail clients, regulation prescribes the leverage limit which cannot exceed a default level of 1:30. In general, we internally classify Retail Clients as follows:

- a. Experienced Retail Clients: Clients that score high marks in our Appropriateness test, demonstrating satisfactory knowledge and experience in trading in complex financial instruments like CFD. Experienced Retail Clients can trade with a variable leverage ratio which cannot exceed 1:30 subject to the caps that we may apply based on our internal principles of risk appetite and tolerance. We reserve the right to introduce additional leverage levels up to the cap of 1:30.

FXJET is owned as a trade name by Bogofinance Capital Markets LTD which is regulated by the Cyprus Securities and Exchange Commission (CySEC) under the license number 321/17

.Address: Arch Makariou III Avenue 134, Yiota Court, Office 101, 3021 Limassol, Cyprus, P.O. Box 51181
Tel: +357 25 249000 **Fax:** +357 25 249009 **Email:** info@fxjet.com **Web:** www.fxjet.com

b. Less Experienced Retail Clients: Clients that score average marks in our Appropriateness test. Whilst such clients are deemed to possess certain knowledge and experience in trading in complex financial instruments like CFDs, their trading is only enabled after they receive extensive risk warnings which they acknowledge, accept and consent to. In order to further protect these clients, we are introducing restrictions on the leverage they can use for their trading with us. We restrict the leverage ratio to 1:30 or at any lower level that we may apply based on our internal principles of risk appetite and tolerance.

Note that certain jurisdictions apply a cap on leverage ratios irrespective of any retail client categorization into Experienced or Less Experienced. In case of any conflict with the provisions of the Investment Services Agreement and Leverage and Margin Policy, local jurisdiction legislation prevails. In the case of Retail clients in the territory of Spain or Spanish subjects, trading in CFDs with a leverage ratio greater of 1:10 applies.

6.2. Professional Clients

Professional clients, whether per se or eligible, are able to trade with higher leverage.

Specifically, the Company offers Professional clients (applicable only those that have Gold and VIP Accounts) the option to select higher leverage ratio of 1:100, 1:200 based on Company's discretion, the client's knowledge, the underlying instrument and our Leverage and Margin Policy.

We note that Maltese and Polish Professional clients are restricted to a maximum of 1:100 leverage ratio according to their local regulation.

6.3. Leverage Profiles

Asset Class	Examples of Financial Instruments in the specific asset class	Leverage Ratios	
		Retail Clients	Professional Clients
Foreign Exchange (FX) Major Pairs	EUR/USD, GBP/USD, CAD/JPY, GBP/CHF	Up to 1:30	Up to 1:200*

*** For more detail information regarding Financial Instruments, please refer to Appendix 1**

a. New Clients that opened their account with less than 3 months of the establishment date of their account that have been classified as Professional Clients will be permitted to trade with a maximum leverage of 1:100. Their Leverage ration may be reviewed by the company after 3 months, following request from the client.

b. Current Clients that established their account for 3 months and over, that have been classified as Professional Clients will be permitted to trade with a maximum leverage of 1:200

Leverages are applied on an asset class basis or on any other basis or per financial instrument as we may determine at our discretion. Subject to change with or without notice to reflect market conditions. The applicable leverage ratios per instrument at any point in time can be found at www.fxjet.com

We reserve the right to reduce leverage ratios for CFDs in financial instruments that maybe the subject of actual or anticipated corporate actions, with or without notice to you, in order to address likely market and financial instrument volatility. We reserve the right to reduce leverage ratios for CFDs in financial instruments that maybe the subject of actual or anticipated corporate actions, with or without notice to you, in order to address likely market and financial instrument volatility. Where possible we will give you 3 business days' notice of such change so as to enable you to take the action you consider appropriate.

7. LEVERAGE TRADING AND MARKIN – KEY TERMS

7.1. What is Leveraged Trading?

Trading on leveraged capital means that you can trade amounts significantly higher than the funds you invest, which only serve as the margin. High leverage can significantly increase the potential return, but it can also significantly increase potential losses. Please see below an

explanation on our “Negative Balance Protection” where we guarantee that you cannot lose more funds than what you have invested.

The leverage is specified as a ratio, such as 1:5, 1:10, 1:20, 1:30. Sometimes, the Leverage is expressed in percentage terms – and referred to as Margin requirement. For example, a leverage of 1:20 is a margin requirement of 5%.

Example: If the leverage is 1:30 and if you as our client have \$1,000 in your account, it means that you can now open trades worth \$30,000.

7.2. What is a Spread?

The spread is the difference between the Bid price (selling price) and the Ask price (buying price) of the CFD.

Example: If the quote for the EUR/ USD pair is 1.1615 against 1.1618, then the spread is 3 pips.

7.3. What is Initial/ Required Margin?

Also known as the Initial Margin Requirement, the Initial Margin is the percentage of a financial instrument price that you, as the client, need to pay for with your own money. This requirement is basically the amount of collateral needed in order to open a margin account.

Required Margin or Margin Requirement refers to the amount you need in order to open and maintain a position, in addition to the initial loss that will occur due to the spread. The Required Margin is derived from the following formula: $(\text{Amount} * \text{Instrument Price}) / \text{Leverage}$.

*Example: If you intend to buy a CFD on 10 barrels of oil at a price of 76.00 per barrel. The leverage on the Oil CFD is 1:10. Your Margin requirement is calculated as follows: $(10 * 76.00) / 10 = \$76.001$*

7.4. What is Equity?

In short, Equity can be defined as the value of your portfolio with us. Effectively it is the value of your funds with X Spot Markets (EU) Ltd (which at any point in time include realized profits and losses) plus the unrealized profit and loss on your CFDs based on their latest quoted valuation.

7.5. Introduction to Margin Level

The Margin Level indicates how close your account is to a margin call. It is calculated as Equity/Initial Margin and is typically shown in “%”. When the margin level decreases, your account bears an increased risk of liquidation. We call this the Close Out (stop out) Level and explain it further below. You are advised that you should monitor this margin level at all

times. Whilst we may from time to time send you notifications of your Margin Level reaching certain thresholds, you are reminded that under the Terms and Conditions Agreement between you and us it is your responsibility to monitor at all times the margin level and take relevant actions.

Relevant actions that you can take to restore your Margin Level include:

- Closing or hedging some of your open positions.
- Depositing more funds that can help in averaging down your position.

Please note that we do not provide advice for the trading decisions and actions you take, including with respect to the actions you may take to address the Margin Level requirements such as the ones we refer to above.

7.5.1. What is Free Margin?

Free Margin is the sum of funds you have available to use as initial margin for new positions. This is calculated by subtracting the margin used for your current open positions from your Equity.

7.5.2. What is Maintenance Margin?

Maintenance Margin refers to the minimum equity you need to have in order to keep your positions open. This is also commonly referred to as “maintenance requirement” or “minimum maintenance” and is the same as the Close Out we refer to above. If your Maintenance Margin reaches 50%, your positions will start to liquidate starting from the position with the highest losses.

Example: You have an open position on EUR/USD with used margin of €1,665. Your Balance is €10,000 and your Equity €900. This means that your maintenance margin is at 54% (Equity of €900 divided by Margin used of €1,665). If your floating loss reaches €9,180 this means that your equity will become €820. Therefore, your maintenance margin will be $820/1665 = 49.25\%$ (<50%) and a Margin Close Out will take place.

7.5.3. What is Used Margin?

Used Margin indicates the sum of margin being used by your current open positions. It is calculated by adding the initial margins of all your open positions.

Example: You open a position of 10,000 EUR/USD at 1.1600.

Assume that the initial margin requirement is 3.33% (i.e. a leverage of 1:30). The margin used for your position is calculated as follows:

$$(10,000 * 1.1600) / 30 = 386.662$$

In addition, you open a position of 100 units of the Apple CFD at 220.00. Assume that the initial margin requirement is 20% (i.e. a leverage of 1:5) and exchange rate of EURUSD 1.1600. So, the initial margin used for this position is calculated as follows:

$$(100*220.00)/5 = 4400 = 4,400.00/1.1600 = 3,793.103$$

Therefore, the total Used Margin that you see in your account with us is 386.66 + 3,793.10 = €4,179.76.

7.5.4. What is Margin Level?

The margin level is a risk management indicator that helps you understand the influence of the currently opened positions on your account.

Margin level is a mathematical equation that effectively tells the trader how much of their funds are available for new trades.

The higher the margin level, the higher the amount of cash available to trade.

The lower the margin level, the lower the amount of cash available to trade and this is where an account could be subject to a margin call.

7.5.5. How is margin level calculated?

It is calculated by the following formula: $\text{Margin level} = \text{equity} / \text{margin} \times 100$

If you don't have any trades open, your margin level will be zero. Once a position is opened, the margin level will depend on several factors such as:

- Volume
- Type of market
- Leverage

7.6. Margin Call

The Company hereby notices Clients that it is each Client's sole responsibility to monitor the margin level of their positions in real-time via the Clients' web trading platform or their mobile/tablet app.

The minimum margin level Clients need to maintain for their open position(s) is 50% margin level for Retail clients and 20% for Professional Clients.

Should Clients' margin level fall below the minimum of 50% for Retail Clients and 20% for Professional Clients, the Company reserves the right to liquidate all or a part of Clients' open trades and close any open positions at the Company's discretion, until the Clients' account margin level rises above the 50% for Retail Clients and 20% for Professional Clients. The Company will liquidate positions starting from the position with the highest loss.

The Company does not provide advice for the trading decisions and actions the Client may take, including with respect to the actions they may take to address the Margin Level requirements such as the ones referred to on the Company's website.

8. NEGATIVE BALANCE PROTECTION

The Company offers all Clients a "Negative Balance Protection". This means that Clients will never lose more than the amounts they invested with the Company.

9. OFFERING CFDs IN CERTAIN JURISDICTIONS

CFDs are not eligible for sale in certain jurisdictions or countries. This Policy is not directed to any jurisdiction or country which is included in the Company's Banned Jurisdictions as this is defined in the Company's Terms and Conditions. The Policy does not constitute an offer, invitation or solicitation to buy or sell CFDs.

10. REVIEW OF THE POLICY

The Policy is reviewed by the Compliance Function on a regular basis and at least once a year.

The Company will update the Policy whenever necessary. Updates may occur in case of:

- changes in legislation;
- changes in the Company's business operations, including the implementation of new systems;
- organisational changes within the Company;
- new internal rules, procedures or policies within the Company;
- emergence of new risks;
- changes in technologies.

The above list is non exhaustive.

Appendix 1

Category	Symbol	Margin Percentage		Leverage	
		Retail	Professional	Retail	Professional
FX - Major	EURUSD	3.34%	0.5%	1:30	1:200
